

Liii STEM Input Method Cheatsheet

November 28, 2025

Liii STEM (<https://liiistem.cn/>) is a WYSIWYG editor that can speed up your mathematical writing by 10x. See Quick formula editing for more details. This is a pdf version cheatsheet of the keys available in Liii STEM Input Method.

Unlike the shortcut hints inside Liii STEM. We distinguish the capital and noncapital letters in this cheatsheet; For example, **J** and **j** are different. We also use **⇧j** to replace **J** where **⇧** represents the Shift key.

When no plus sign is shown between different keyboard keys, it means they should be pressed in sequence. Alternatively, a plus sign between them means they should be pressed at the same time.

For modifier keys (and their combination such as **ctrl⇧**) **⇧**, **ctrl**, **alt** (Windows) or **option** (Mac), and **cmd** (Mac), the plus sign after them means to hold down the modifier key while pressing the next key. For example, **ctrl+s** means to hold down the **ctrl** key and press the **s** key.

All **tab** keys represents tab variant. For example, to insert ∇ , press **⇧v** and press **tab** twice. To insert Φ , press **⇧v** and press **tab** once. In the rest of this tutorial, we do specify the exact number of **tab** we used, i.e., the keyboard expression for both ∇ and Φ is **⇧v+tab**.

Windows  GNU/Linux 	Mac 	Equivalent in \LaTeX 
Environmental Shortcuts		
space + tab	space + tab	Non-breaking space (<code>\nbsp</code> or <code>~</code>)
ctrl + t	\	<code>\indent</code>
ctrl + l	\	<code>\raggedleft</code>
ctrl + e	\	<code>\centering</code>
ctrl + r	\	<code>\raggedright</code>
alt + 1	option + 1	<code>\section</code>
alt + 2	option + 2	<code>\subsection</code>
alt + 3	option + 3	<code>\subsubsection</code>
alt + 4	option + 4	<code>\paragraph</code>
alt + 5	option + 5	<code>\subparagraph</code>
alt + 6	option + 6	<code>\appendix</code>
+ + tab	+ + tab	<code>\itemize</code>
1 + . + tab	1 + . + tab	<code>\enumerate</code>
\$	\$	inline math mode
alt + \$	option + \$	single-line math mode

(continued next page) 

 (from previous page)

Windows  GNU/Linux 	Mac 	Equivalent in \LaTeX 
alt + &	option + &	multi-line math: <code>eqnarray</code>
ctrl + \$	ctrl + \$	multi-line math: <code>align</code>
ctrl + #	ctrl + #	add equation number
alt + arrow	option + arrow	add new row/column in <i>matrix/table/choice/stack</i>
ctrl⇧ + f	ctrl⇧ + f	add footnote
ctrl + n	cmd + n	add new script
ctrl + p	cmd + p	export to PDF
Common Constructs		
x + ^ + 2	x + ^ + 2	x^2 (<code>x^2</code>)
x + _ + i + , + j	x + _ + i + , + j	$x_{i,j}$ (<code>x_{i,j}</code>)
alt + s + 2	option + s + 2	$\sqrt{2}$ (<code>\sqrt{2}</code>)
alt + s + Tab + 3 + ← + ← + n	option + s + Tab + 3 + ← + ← + n	$\sqrt[3]{2}$ (<code>\sqrt[n]{3}</code>)
alt + f	option + f	$\frac{2}{3}$ (<code>\frac{2}{3}</code>)
Font		
A + A	A + A	Background A (<code>\mathbb{A}</code>)
F7 + A or A + A + tab	F7 + A or A + A + tab	Calligraphic A (<code>\mathcal{A}</code>)
F8 + A or A + A + tab	F8 + A or A + A + tab	Gothic A (<code>\mathfrak{A}</code>)
ctrl + b + A or A + A + tab	cmd + b + A or A + A + tab	Bold A (<code>\mathbf{A}</code>)
ctrl + i + A	cmd + i + A	Italic A (<code>\mathit{A}</code>)
Greek Letters		
a + tab	a + tab	α (<code>\alpha</code>)
b + tab	b + tab	β (<code>\beta</code>)
g + tab , G + tab	g + tab , G + tab	γ (<code>\gamma</code>), Γ (<code>\Gamma</code>)
d + tab , D + tab	d + tab , D + tab	δ (<code>\delta</code>), Δ (<code>\Delta</code>)
e + tab	e + tab	ϵ (<code>\epsilon</code>)
e + tab	e + tab	ε (<code>\varepsilon</code>)
z + tab	z + tab	ζ (<code>\zeta</code>)
